Natural Resources FORUM

Natural Resources Forum, a journal of the United Nations Department of Economic and Social Affairs, seeks to meet the need for an international, multidisciplinary journal focused on the sustainable development and management of the water, energy and mineral resources of developing countries. The *Forum* examines the economic, financial, legal and environmental aspects of natural resource development with a view to identifying those factors which influence and further the process. The topics covered include, *inter alia*: resource development and management; resource availability and demand; marketing and pricing; natural resource legislation, policy and planning; energy, mineral and water resource economics; energy conservation; rural energy and new and renewable energy; infrastructure development, finance and taxation; mineral and petroleum law; and government and industry relations.

Manuscripts for submission and books for review should be sent to: Ms Marcia Brewster, Editor-in-Chief, Natural Resources Forum, Room DC1-822, Department of Economic and Social Affairs, United Nations, New York, NY 10017, U.S.A.
